

Future Urban Water LEADers

@ResilientLifeTeam

@ResilienceIsArt

Our Mission is to nurture STRONG and Resilient Future Urban Water & Community LEADers + Resilient BIPOC Communities!

Our youth-led environmental groups remove trash from important urban water bodies that impact the Gulf of Mexico. They are paid a stipend to engage in these urban water cleanup efforts. FUWL youth also benefit from educational trips and/or career fairs to gain mentorship, knowledge, and exposure. FUWL youth eligible for this program resides in high-opportunity communities and also receive support connecting to youth employment.

Through these youth-led environmental actions, our aim is to nurture the 5 RESILIENCE PILLARS below:

1. Emotional Wellbeing
2. Inner Drive
3. Future Focus
4. RELATIONSHIPS
5. Physical Health

PARTNERS IN RESILIENCE:
